Index

Volume 16, 1984

January 1–96
April 97–190
July 191–286
October 287–374

Alternative Approaches to Hierarchical Location-Allocation Systems, M. John Hodgson, 275–81

Anderson, Stanley H. *See* Inkley, Douglas B.

Assessing the Significance of a Spatial Correlogram, Neal L. Oden, 1–16

Barber, Gerald M. *See* Ralston, Bruce A.

Baxter, Mike, A Note on the Estimation of a Nonlinear Migration Model Using GLIM, 282–86

Bivand, R. S., Regression Modeling with Spatial Dependence: An Application of Some Class Selection and Estimation Methods, 25–38

Boots, B. N., Evaluating Principal Eigenvalues as Measures of Network Structure, 270–75

Carter, Jacquelyn E. *See* Phipps, Alan G.

Chapman, G. R., B. Smit, and W. R. Smith, Flexibility and Criticality in Resource Use Assessment, 52–64

Clark, Gordon L., and Takatoshi Tabuchi, Regional Wage and Price Dynamics, 223–43

Clark, W. A. V. *See* Smith, Terence R.

Concepts and Models of a Quantitative Sociology: The Dynamics of Interacting Populations, W. Weidlich and G. Haag, reviewed, 95–96

Cotton, John W. *See* Smith, Terence R.

Craig, C. Samuel. *See* Ghosh, Avijit

Cross-Regional Variation of In-Migration and Out-Migration, The, David Plane, Peter Rogerson, and Allan Rosen, 162–75

de Jong, P., C. Sprenger, and F. van Veen, On Extreme Values of Moran's I and Geary's c, 17–24

Dendrinos, Dimitrios S., and Günter Haag, Toward a Stochastic Dynamical Theory of Location: Empirical Evidence, 287–300

Deriving and Testing Production System Models of Sequential Decision-Making Behavior, Terence R. Smith, W. A. V. Clark, and John W. Cotton, 191–222

Distcorrelation Matrix: A Spatial Correlation Trend Analysis, Yair Goldreich, 358–68

Evaluating Principal Eigenvalues as Measures of Network Structure, B. N. Boots, 270–75

Flexibility and Criticality in Resource Use Assessment, G. R. Chapman, B. Smit, and W. R. Smith, 52–64

Ghosh, Avijit, and C. Samuel Craig, A Location Allocation Model for Facility Planning in a Competitive Environment, 39–51

Ghosh, Avijit, and Sara McLafferty, A Model of Consumer Propensity for Multipurpose Shopping, 244–49

Goldreich, Yair, Distcorrelation Matrix: A Spatial Correlation Trend Analysis, 358–68

Guidelines for Designing an Abstract New Town, Y. Y. Papageorgiou and M. E. O'Kelly, 97–120

Haag, Günter. *See* Dendrinos, Dimitrios S.

Haag, Günter, and Wolfgang Weidlich, A Stochastic Theory of Interregional Migration, 331–57

Hanink, Dean M., A Portfolio Theoretic Approach to Multiplant Location Analysis, 149–61

Hodgson, M. John, Alternative Approaches to Hierarchical Location-Allocation Systems, 275–81

Individual-Level Analysis of the Stress-Resistance Model of Household Mobility, An, Alan G. Phipps and Jacquelyn E. Carter, 176–89

Inkley, Douglas B., Stanley H. Anderson, Steve G. Mankowski, and Lyman L. McDonald, An Objective Method for Comparing Resource Distributions, 369–72

Jones, Donald W., A Land Use Model with a Constant-Utility Spatially Variant Wage, 121–33

Kohsaka, Hiroyuki, An Optimization of the Central Place System in Terms of the Multipurpose Shopping Trip, 250–69

Land Use Model with a Constant-Utility Spatially Variant Wage, A, Donald W. Jones, 121–33

Liaw, Kao-Lee, book review, 95–96

Location Allocation Model for Facility Planning in a Competitive Environment, A, Avijit Ghosh and C. Samuel Craig, 39–51

Mankowski, Steve G. *See* Inkley, Douglas B.

Masuda, Satoru. *See* Okabe, Atsuyuki

McDonald, Lyman L. *See* Inkley, Douglas B.

McLafferty, Sara. *See* Ghosh, Avijit

Measuring Migration Fields of U.S. Counties, Paul B. Slater, 65–73

Model of Consumer Propensity for Multipurpose Shopping, A, Avijit Ghosh and Sara McLafferty, 244–49

Note on the Estimation of a Nonlinear Migration Model Using GLIM, A, Mike Baxter, 282–86

Objective Method for Comparing Resource Distributions, An, Douglas B. Inkley, Stanley H. Anderson, Steve G. Mankowski, and Lyman L. McDonald, 369–72

Oden, Neal L., Assessing the Significance of a Spatial Correlogram, 1–16

Okabe, Atsuyuki, and Satoru Masuda, Qualitative Analysis of Two-dimensional Urban Population Distributions in Japan, 301–12

O'Kelly, M. E. *See* Papageorgiou, Y. Y.

On Extreme Values of Moran's I and Geary's c, P. de Jong, C. Sprenger, and F. van Veen, 17–24

Optimal Length of a Marketing Week, The, A. H. Zemanian, 134–48

Optimization of the Central Place System in Terms of the Multipurpose Shopping Trip, An, Hiroyuki Kohsaka, 250–69

Papageorgiou, Y. Y., and M. E. O'Kelly, Guidelines for Designing an Abstract New Town, 97–120

Phipps, Alan G., and Jacquelyn E. Carter, An Individual-Level Analysis of the Stress-Resistance Model of Household Mobility, 176–89

Plane, David, Peter Rogerson, and Allan Rosen, The Cross-Regional Variation of In-Migration and Out-Migration, 162–75

Portfolio Theoretic Approach to Multiplant Location Analysis, A, Dean M. Hanink, 149–61

Qualitative Analysis of Two-dimensional Urban Population Distributions in Japan, Atsuyuki Okabe and Satoru Masuda, 301–12

Ralston, Bruce A., and Gerald M. Barber, Taxation and Optimal Road Penetration, 313–30

Regional Wage and Price Dynamics, Gordon L. Clark and Takatoshi Tabuchi, 223–43

Regression Modeling with Spatial Dependence: An Application of Some Class Selection and Estimation Methods, R. S. Bivand, 25–38

Rogerson, Peter. *See* Plane, David

Rosen, Allan. *See* Plane, David

Slater, Paul B., Measuring Migration Fields of U.S. Counties, 65–73

Smit, B. *See* Chapman, G. R.

Smith, Terence R., W. A. V. Clark, and John W. Cotton, Deriving and Testing Production System Models of Sequential Decision-Making Behavior, 191–222

Smith, Tony E., Testable Characterizations of Gravity Models, 74–94

Smith, W. R. *See* Chapman, G. R.

Sprenger, C. *See* de Jong, P.

Stochastic Theory of Interregional Migration, A, Günter Haag and Wolfgang Weidlich, 331–57

Tabuchi, Takatoshi. *See* Clark, Gordon L.

Taxation and Optimal Road Penetration, Bruce A. Ralston and Gerald M. Barber, 313–30

Testable Characterizations of Gravity Models, Tony E. Smith, 74–94

Toward a Stochastic Dynamical Theory of Location: Empirical Evidence, Dimitrios S. Dendrinos and Günter Haag, 287–300

van Veen, F. *See* de Jong, P.

Weidlich, Wolfgang. *See* Haag, Günter

Weidlich, W., and G. Haag, *Concepts and Models of a Quantitative Sociology: The Dynamics of Interacting Populations*, reviewed, 95–96

Zemanian, A. H., The Optimal Length of a Marketing Week, 134–48
